

hp designjet 5000/5000ps
large-format printers

Production speed delivering
ultimate photo quality.

The HP DesignJet 5000/5000PS printers deliver a combination of production speed and ultimate photo quality unmatched by any other printer in their class.¹ Up to five times faster than the HP DesignJet CP Series printers!

hp designjet 5000ps

Fully loaded, with an Adobe PostScript 3 RIP designed for print-service providers, quick-printers and graphics professionals. The RIP processes while the printer is printing and delivers excellent productivity, color management and output predictability.

hp designjet 5000

Open system, connectable to external RIPs: those, for example, that you are already using with other large-format printers or color laser copiers, or specialized RIPs that focus on a particular application such as pre-press proofing.

Two Sizes:

Both printers come in two sizes, with a media path that is either 60 inches or 42 inches wide.

Unprecedented speed with ultimate photo quality

- With a production speed of 569 ft²/hr,² the printers are up to five times faster than the HP DesignJet CP Series printers!
- High printing speeds are the result of HP's JetExpress technology with a revolutionary one-inch wide printhead.
- Ultimate photo quality with continuous tones, smooth transitions and a wide color gamut is achieved using HP color layering technology, six ink colors (CMYKcm) and 1200-dpi resolution.³

Increased productivity

- Remote control via HP DesignJet WebAccess through your internet browser: job previewing, queue management, display of ink and media consumption levels, and accounting information.
- Very fast data transmission using a powerful HP JetDirect 10/100 Base-TX print server.

Low cost of operation

- Incredibly low cost of supplies
- High unattendedness with 680-cc ink cartridges, printheads that last for two to three cartridges, media rolls of up to 300 feet in length, and a take-up reel (optional on the 42-inch models).
- New media saving features: length tracking plus downloadable profiles from HP's web site to ensure best results when using new media.

Consistent and accurate colors

- Consistent colors are produced from one print to the next and from one printer to another using automatic closed-loop-color calibration.
- The HP DesignJet 5000PS incorporates Automatic PANTONE Calibration, offset-printing press emulations (Euroscale, SWOP, DIC and TOYO), and ICC profiles for Macintosh and Windows.
- The HP DesignJet 5000PS also emulates other HP DesignJet printers (HP DesignJet 1055CM, 2500CP and 3500CP).
- Approximately 90% of the PANTONE[®] spectrum is covered.
- The HP DesignJet 5000 accurately reproduces both CMYK-defined and RGB-defined colors. Advanced features can be added via an external RIP.

Great ink and media flexibility

- Modular ink system with a choice of two ink sets: dye-based, and pigment-based UV inks.⁴
- Image durability of 24 months outdoors⁵ and five years indoors using HP's UV inks and the 3M™ Matched Component System.™
- A wide choice of HP media types is available, including three new types: HP Photo Imaging Gloss, HP Photo Imaging Satin and HP Satin Poster Paper.

Great RIP support

- Embedded Adobe® PostScript® 3™ RIP in the HP DesignJet 5000PS ensuring extremely fast processing from the Macintosh® and Windows® drivers included.
- The printers can also be driven by the most common external RIPs on the market. For more information refer to the HP web site at www.hp.com/go/designjet and select "Solutions".
- Embedded HP-GL/2 processor with drivers for AutoCAD® and Windows.

HP Warranty

- One-year warranty with free, on-site, next business-day service. HP SupportPacks and Service Agreements allow you to extend your warranty to up to 5 years, and can provide around-the-clock service with a response time of within 4 hours, every day of the year (depending on the country).

¹ SpencerLab report, August 2000. See www.spencerlab.com

² On the 60-inch model on coated paper

³ Addressable 1200 dpi x 600 dpi on glossy media

⁴ Available from spring 2001

⁵ In regions with extreme solar energy, the outdoor warranty period is 18 months

Technical specifications

Print technology	• HP Color Thermal Inkjet		
Print speeds⁶ on coated paper	Max speed:	Productivity:	Max quality:
60-inch model	• 569 ft ² /hr	• 100 ft ² /hr	• 76 ft ² /hr
42-inch model	• 499 ft ² /hr	• 89 ft ² /hr	• 68 ft ² /hr
Maximum resolution	• Addressable 1200 dpi x 600 dpi on glossy media		
Media types	• Coated, glossy, back-lit, opaque vinyl, canvas, poster paper and more		
Media handling	• Roll feed, sheet feed, automatic cutter • Take-up reel (optional on the 42-inch models)		
Media sizes	Sheet	Roll	
60-inch models:	• width: 8.3 in. to 36 in. • length: 22 in. to 63 in.	• width: 24, 36, 42, 54 and 60 in. • length: up to 300 feet	
42-inch models:	• width: 8.3 in. to 36 in. • length: 22 in. to 63 in.	• width: 24, 36 and 42 in. • length: up to 300 feet	
Minimum line width	• 0.003 inches		
Line accuracy	• +/- 0.02%		
Margins	Normal (default setting)	Extended	
Lateral and trailing edge:	• 7 mm	• 15 mm
